SFERS Pension Formula

Service Retirement Benefit Calculation:

\text{Credited Service} \times \text{Age Factor (see SPP)} \times \text{Average Monthly Final Compensation} = \text{Monthly Service Retirement Benefit}
\]

Calculating Your Estimate

Estimate of your final benefit

- Actual calculation of your benefit will be based on payroll data available to SFERS after you have been paid your last pay period earnings

- Adjustment of your initial benefit amount may be possible after retirement to include earnings not included in the original calculation, (e.g., retro)

- You will receive your first pension payment 30 – 45 days from the latter of your retirement date, application filing date, or your last day on payroll, or if a disability retirement, once your application is granted
Choose Your Retirement Date

Factors to consider

- Retirement Qualifications
- Maximum Service and Disability Retirement percentage: 75%
- Salary Increases
- Use of vacation or paid sick leave before retirement (counts toward credited service)
  - lump sum vacation payout does not count toward credited service
    - form must be completed and submitted before your last day of employment for lump sum
      vacation rollover to SFDCP
- COLAs effective July 1 – for retirement effective on or before July 1
- Personal matters

- You will receive a 1099-R Form each January showing benefits paid to you in the prior year

COLAs

Cost of Living Adjustments (Active Members)
- Retiree COLAs are not the same as active member COLAs
- Active member COLAs are increases in pay negotiated between labor unions and the City

- Details about your COLA are included the MOU (Memorandum of Understanding) covering your job classification
